UNDERSTANDING MUCORMYCOSIS

Also known as a **black fungus**, is a serious but rare fungal infection caused by a group of molds called **mucormycetes**.
Mostly seen in people who have less ability to fight off infection.

CAUSES

Uncontrolled Diabetes

Post Covid -19

AIDS

Steroids

Decreased ability to fight germs

Spores coming in contact with an open wound

PREVENTION

Use masks if you are visiting dusty construction sites

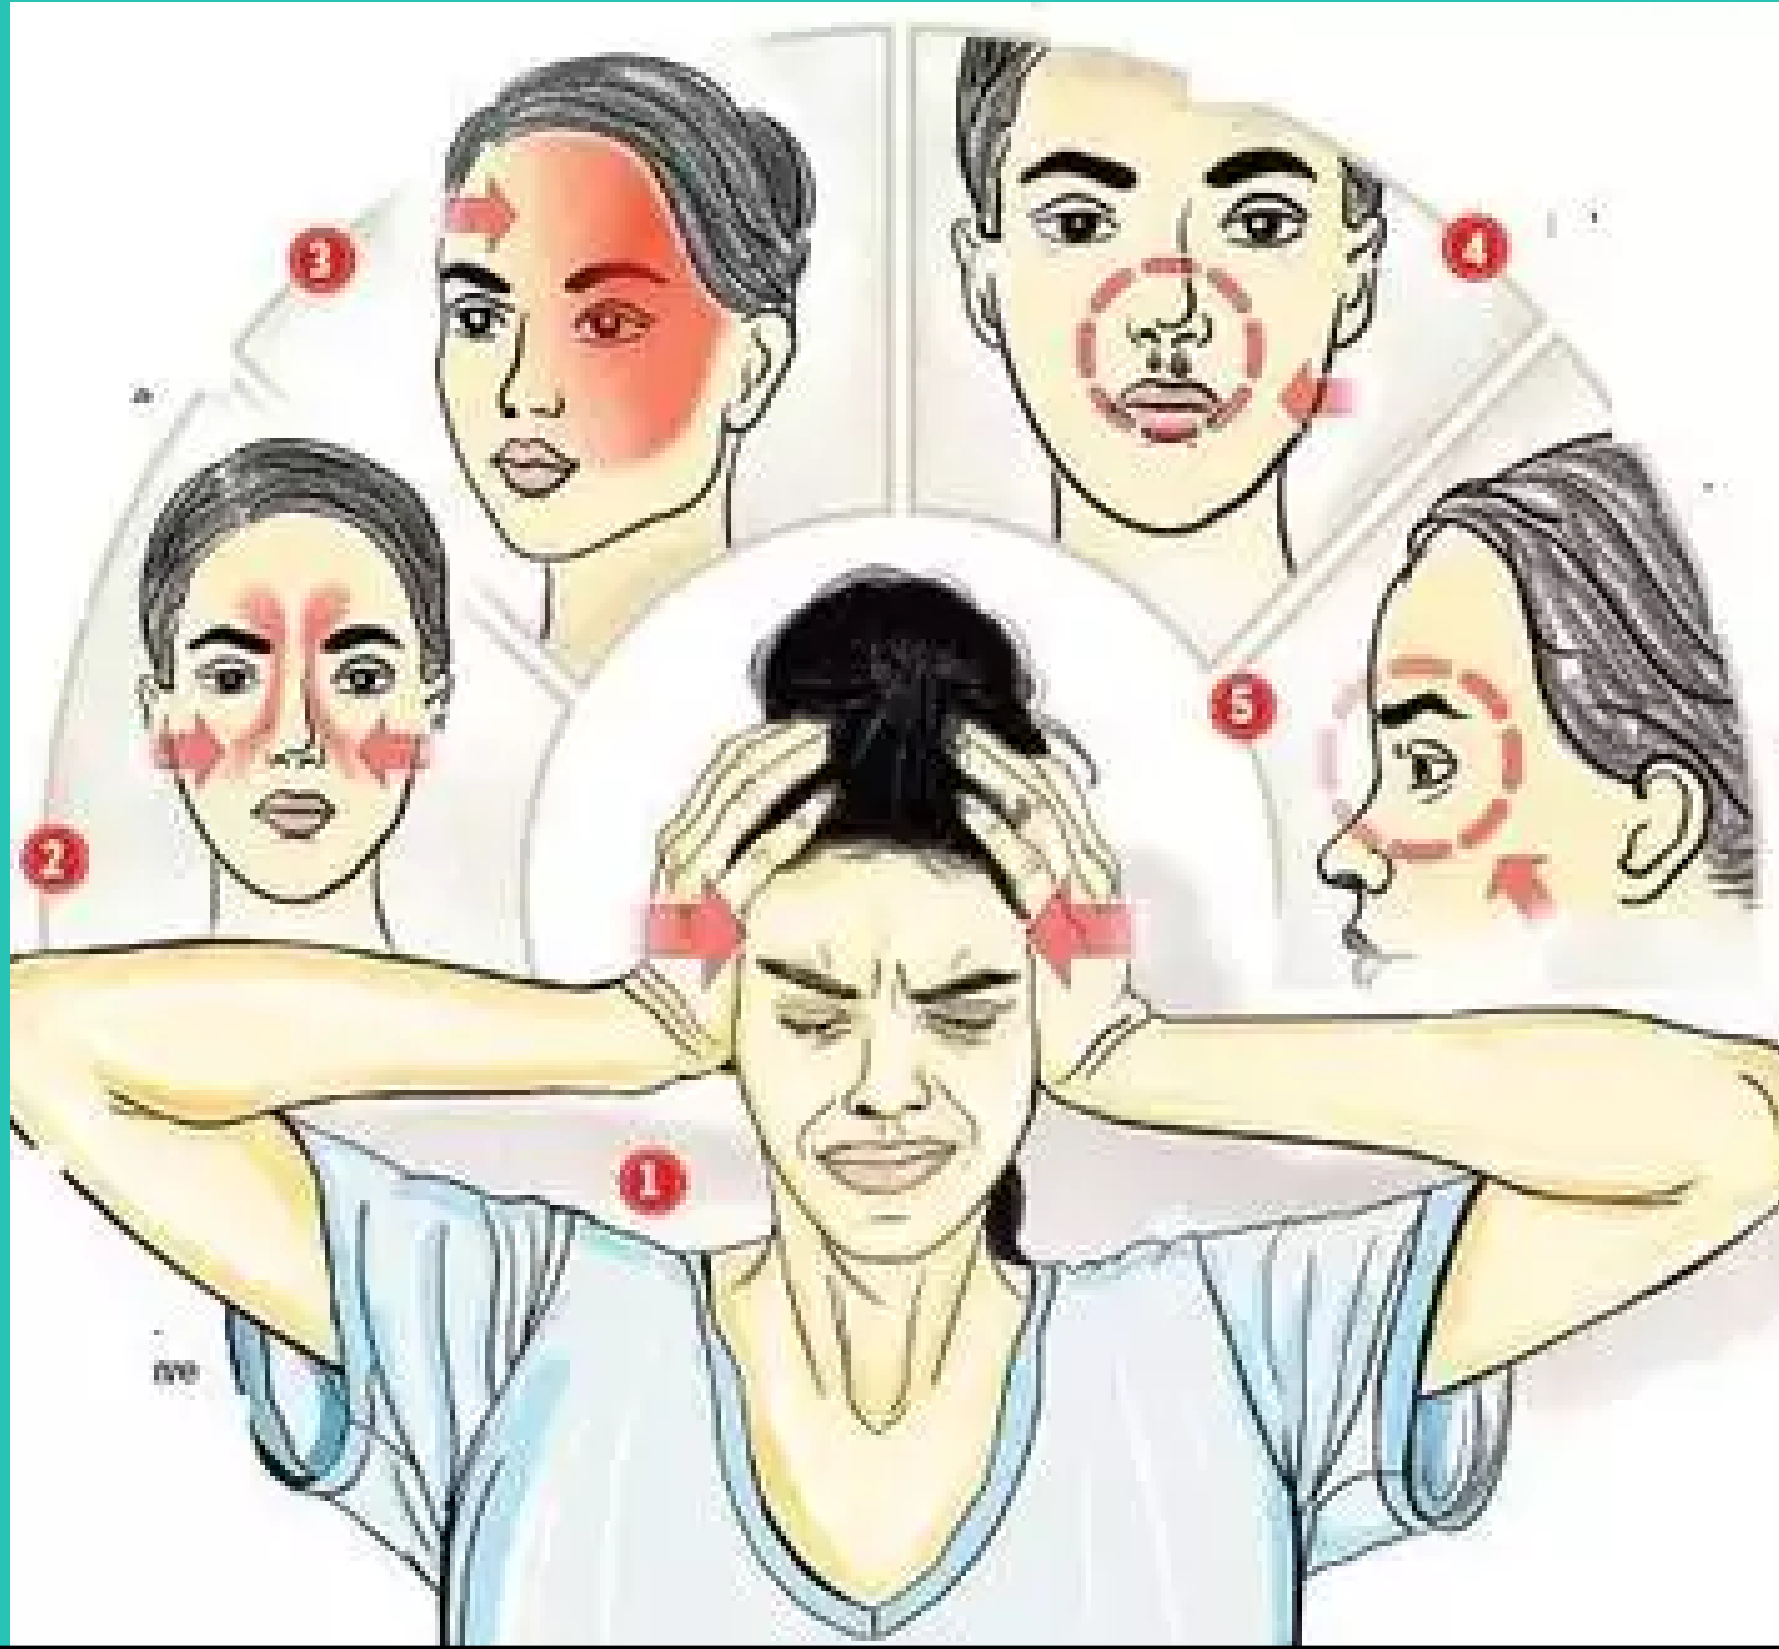

Maintain personal hygiene including thorough scrub bath

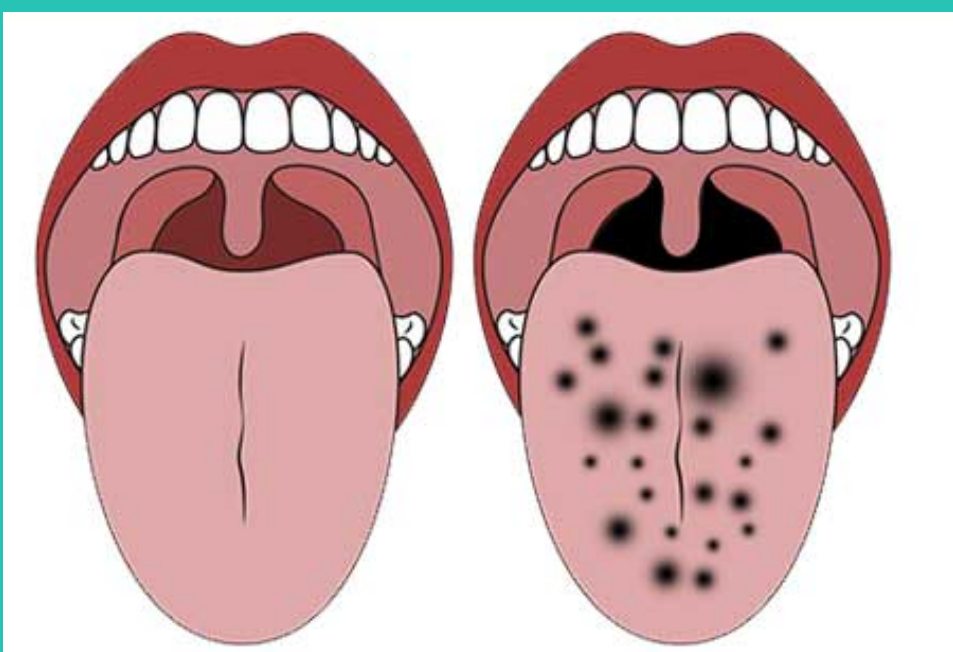

Wear shoes, long trousers, long sleeve shirts, gloves while handling soil, moss or manure

SIGNS TO LOOK OUT FOR

Pain and swelling around the nose, eyes, cheeks, headache, nasal congestion, facial pain, black lesions on upper part of the mouth

HOW DENTISTS CAN HELP

Your dentist will be able to detect the signs of mucormycosis at an early stage and will be able to guide you about oral hygiene methods.

Since, all the virus and fungus enters the body through the mouth,

It is important to,

- Take care of oral hygiene

- Detect early signs

- Disinfecting toothbrushes and tongue cleaners periodically

LET US HEAR FROM THEM!

The team is really good and makes your scary extraction also smooth and easy going. Just like the name Zero Cavity, they Zero pain in their treatment. A true front line warrior for dental and oral issues aka Dr. Dhruvi. More power to you ☐

- MR. ADITYA SANKRANI
