IN ADVANCE!

WHITER, BRIGHTER SMILE AT
ZERO CAVITY IN JUST ONE

ATTENTION MEN!

WHY ARE WOMEN LEADING THE RACE WHEN IT COMES TO ORAL HEALTH??

WOMEN BRUSH MORE OFTEN THAN MEN!

women are over 8% more likely to brush their teeth twice every day than men are. So all you women out there, encourage your spouses to brush well.

MEN PUT THEMSELVES AT MORE RISK THAN WOMEN

men are observed to be more indulgent in habits like

- SMOKING
- EATING TOBACCO
- CHEWING PAAN
- EXCESSIVE ALCOHOL

MEN EXPERIENCE MORE TOOTH TRAUMA

It is observed that women athletes are more particular about wearing their ,mouthguards than their male counterparts

WOMEN SEE THE DENTIST MORE OFTEN

- it is observed that women are more particular about regular check ups and sollow ups at the dentist
- also,women are considered to be more particular about how their teeth look

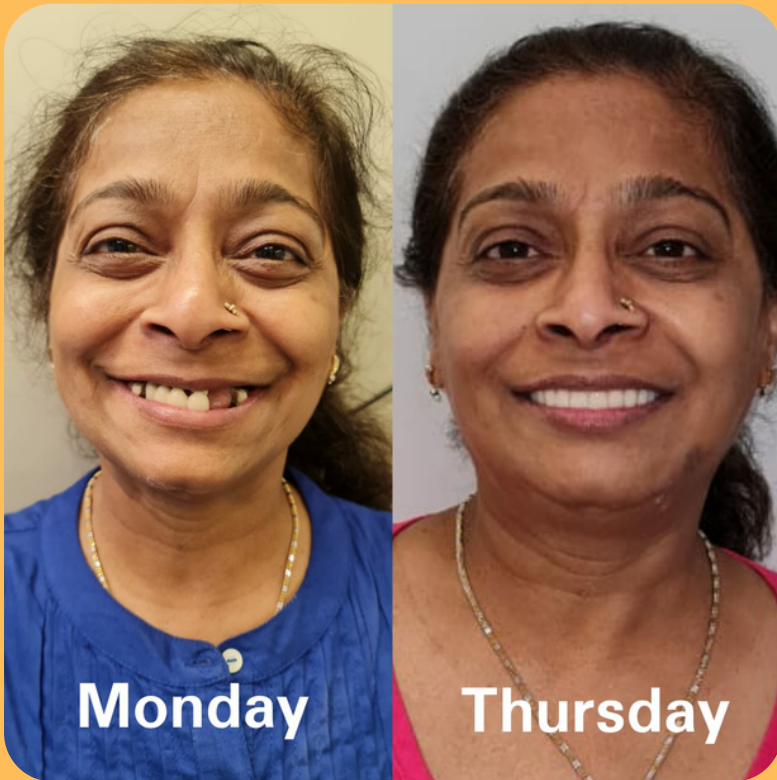

WOMEN OFTEN EXPERIENCE SUDDEN SPIKES IN ORAL ISSUES

- as only women go through pregnancy and menopause,women obviously go through more concentrated elevation and changes in hormones in general.
- this leads to man changes in the oral cavity.
