

AUGUST 2020

# Zero Cavity Club

A NEWSLETTER BY DR. SAILI MASURKAR

We successfully completed many treatments with the best possible precautions!  
Thanks for trusting us during this pandemic!

# A Secret Weapon - Interdental Brushes

These are small toothbrushes, with minute bristles that can easily fit in between the teeth to ensure a good, thorough clean. They come in many sizes depending on how large the gaps between your teeth are.

Why and where do we need it?

The majority of disease-causing bacteria can be found under the gums and between the teeth. So it is important to clean this area specially with interdental brushes.

Wishing you a wonderful  
and joyful August!

Michhami  
Dukkadam

It is discouraged using  
mouth mask with valves  
as there is a risk of  
transmission
