A NEWSLETTER BY DR. SAILI MASURKAR

*A team that works together,
definitely celebrates together!!*

*It's always great when we get to
take some time out of work to bond
and enjoy with the*

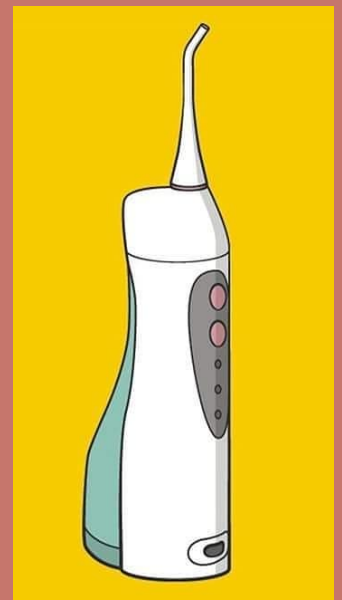

amazing company and food

*Dr. Dhruiti's birthday
celebration done right !!*

WATER FLOSSER

A portable handheld device which shoots a stream of water at your teeth at a force strong enough to dislodge food particles or even a layer of plaque

Why it might be good for you?

- *You are not diligent to use string floss
- *You have dental work like braces which makes string floss tricky to use
- *Your teeth aren't super straight
- *You hate traditional flossing.

Here it from them..

I was told about water flosser a year ago by Zero Cavity Dental Clinic and I have been using it since. There has been a healthy difference in my teeth and gums since I started using it. Less bleeding and no tartar formation. It barely takes 10 mins and since I am unable to use the string floss with ease the water flosser has been my teeth savior. 😊

- Mrs. Usha Masurkar

Ordered online the product as recommended by Dr. Dhruti.

Initially I was reluctant but later I saw that its really very good. Complete oral care solution.

It flushes out food particle between the teeth with no damage to the gums. This product has improved my mouth and gum health enormously. Feels fresh and clean. The water jet force can be conveniently adjusted to suit the individual while using. Very user friendly.

-Mr. Kalpesh Dhami
